

K71R Firmware / Application software Upgrade Guide

It's recommended to check for firmware upgrade for your keyboard before using it for the first time.

Changelog:

- Firmware version: 1.21
- Fixed string output issue in wireless mode
- Fix the definition of search hotkey function

Upgrade Steps:

1. Switch the button to W for wired mode
2. Connect your keyboard and your PC via USB cable
3. Run firmware upgrade application and click Start to begin upgrading.

DO NOT UNPLUG THE USB CABLE, TURN OFF OR RESTART YOUR PC WHILE UPGRADING.

4. Upgrade completed – you may now use your keyboard normally.
