

## How to add solid-color mode to wired K585?

1) Download the software for wired K585,

[https://cdn.shopify.com/s/files/1/0012/4957/4961/files/Redragon\\_K585RGB\\_Keyboard.exe?v=1639105350](https://cdn.shopify.com/s/files/1/0012/4957/4961/files/Redragon_K585RGB_Keyboard.exe?v=1639105350)

2) Update the K585 firmware again through this link,

<https://drive.google.com/file/d/1epw85UImQ82PNyTfbOLkJ-XwRK7iQAzq/view?usp=sharing>

3) There will be a light mode not named added to the keyboard which is the solid-color mode.

4) After updating the firmware successfully, you can press FN+space to switch the lighting mode.
