

## TCP300 USB DEVICE VIEWER

Version: 0.4.0.0

OS: Windows 2000, Xp, Vista, Vista64

Usage: This is the Utility to see the Registry information of the USB devices on the PC.  
By using this utility it is possible to confirm the Virtual Com Port No. to which TCP series is connected.

How to use: Execute "DeviceView.exe"

This is where Star TCP series is connected.
