Änderungsgrund/ reason of change:

new release of the Tally Dascom 26x0 driver V1.1

**Driver versions :**

Windows Vista/Windows 7/Windows 8+8.1/Windows10 (32/64 bit versions): V1.1

**Changes from V1.0 to V1.1:**

- The driver is now "package aware" and therefore no longer suitable for Windows 2000/XP. For these Windows versions use V1.0
- The driver was MS certified for Windows 7, but will also be recognized as signed by other Windows versions including Win10.
- Updated the version number in the invisible driver ID string, the \*.GPD files and the oemsetup.inf and updated the creation date in oemsetup.inf
- improved DriverSetup.exe application, now with optional automatic printer detection
