■ Recommended toner cartridges

To assure optimal printing performance, we recommend that you use only genuine TOSHIBA toner cartridges. If you use a TOSHIBA-recommended toner cartridge, you can utilize the following three functions of this equipment:

Cartridge detecting function: This function checks if the toner cartridge is correctly installed and notifies you if it is not.

Toner remaining check function: This function notifies you when there is little toner remaining in the cartridge.

Image quality optimization function: This function controls image quality according to the characteristics of the toner to be used and enables you to print images of an optimal quality.

If you are using a toner cartridge other than the one we recommend, the equipment may not be able to detect whether it is installed or not. Therefore, even if the toner cartridge is correctly installed, the error message "ERROR: TONER" appears on the LCD screen and printing may not be performed. You may also not be able to utilize the image quality optimization function and the toner remaining check function.

If you are using a toner cartridge other than the one we recommend, toner is not recognized. If this is a problem for you, please contact your service representative. Remember you will not be able to utilize the Toner remaining check function and Image quality optimization function as we mentioned.

□ Paper types not acceptable

Do not use the types of paper listed below since they may cause paper misfeeds.

- Damp paper
- Creased paper
- Wrinkled paper or paper prone to be curled
- Extremely smooth or rough surface paper

Do not use the types of paper listed below since they may cause an equipment malfunction.

- Paper whose surface is specially treated
- Paper once printed with other copiers or printers

□ Storing paper

Note the following points when storing paper.

- Wrap the paper in its packaging to prevent it from gathering dust.
- Do not expose the paper to direct sunlight.
- Do not store the paper in a humid location.
- Store the paper on a flat surface to prevent it from becoming curled or creased.

- 3 Remove the side guides.**

- 4 Attach the side guides according to the paper size.**

5 Load paper face up in the drawer.

Notes

- Up to 250 sheets (80 g/m² or 20 lb. Bond) can be loaded. Be sure that the height of the stacked paper does not exceed the line indicated inside of the trailing guides.
 P.18 "Acceptable paper types"
- Fan the paper well before loading it in the drawer, otherwise multiple feeding could occur. Be careful not to cut your fingers.
- The printable side may be noted on its packaging.

6 Move the end guide to the trailing edge of the paper while pushing its lower part in the direction of the arrows.

Note

Widen the gap with both hands.

7 Push the drawer straight into the equipment slowly until it stops.

⚠ CAUTION

Do not catch your fingers in the drawer when closing it.
 This could cause injury.

Register the paper size into the equipment.

When you load paper in the drawer for the first time, register the paper size. Be sure to register it correctly, otherwise it could cause a paper misfeed.

For the registration, see the following page:

P.27 "Preparation 3 - Registering Paper Size and Type"

Note

Be sure to register the paper size each time you have changed it.

■ Loading paper on the bypass tray

Note

The contents of the original(s) are rotated when copied on paper of the following sizes fed from the bypass tray.

A/B format: A3, A4-R, A5-R, B4, B5-R, FOLIO

LT format: LD, LG, LT-R, ST-R, COMP, 13"LG, 8.5"SQ

K format: 8K, 16K-R

For example, to copy an A5-size original, place the original on the original glass in A5 portrait orientation and paper on the bypass tray in A5 landscape orientation (A5-R).

To enlarge an A4-size original to A3, place the original on the original glass in A4 portrait orientation and A3 paper on the bypass tray.

The illustrations below are example of loading A4/LT size paper.

For the acceptable paper, see the following page:

📖 P.18 "Acceptable paper types"

1 Open the bypass tray.

2 Release the lever on the left, and then load paper face down and straight on the bypass tray.

Note

The printable side may be noted on its packaging.

3 Align the side guides with the edges of the paper, and then push back the lever.

1

Notes

- Up to 50 sheets of plain paper (80 g/m² or 20 lb. Bond) can be loaded. Be sure that the height of the stacked paper does not exceed the indicators of the side guides. If paper other than plain is used, set it one sheet at a time.
- Fan the paper well before loading it on the bypass tray, otherwise multiple feeding could occur. Be careful not to cut your fingers.
- Do not push the paper forcibly into the entrance of the bypass feeder, otherwise it could cause a paper misfeed.

Tip

When you use paper longer than the bypass tray size, pull out the paper holder from the tray, and then open it.

■ Loading an envelope on the bypass tray

For the acceptable envelope sizes, see the following page:

📖 P.18 "Acceptable paper types"

Correct bent corners of the envelope.

2 Open the bypass tray.

3 Release the lever on the left, and then load the envelope face down on the bypass tray.

Place the envelope with its flap side at the front as shown below.

Note

Do not copy or print on the back of envelopes, otherwise it may cause a paper misfeed or soil them or the inside of the equipment.

-
- 4** Align the side guides to the edges of the envelope, and then push back the lever.

Preparation 3 - Registering Paper Size and Type

When you load or change paper, a pop-up window appears. Follow the instructions to register the items below in the equipment.

- For the drawer: the paper size

■ Acceptable originals

Acceptable originals differ depending on the setting position. See the table below for more details.

If you are using the Automatic Document Feeder, you can automatically scan a stack of plain paper originals at one time.

Setting position	Type	Maximum size	Acceptable sizes for automatic size detection*1	Maximum number of sheets
Original glass	Plain paper Special paper Booklets	A4 or LT	-	-
Automatic Document Feeder	Plain paper (50 - 104 g/m ² , 13 - 27 lb. Bond)	A3 or LD	Other than North America and China: A3, A4, A4-R, A5-R, B4, B5, B5-R North America: LD, LG, LT, LT-R, ST-R, COMP China: A3, A4, A4-R, A5-R, 8K, 16K, 16K-R	50 sheets (80 g/m ² , 20 lb. Bond) (or stack height 9.5 mm)*2

*1 The automatic size detection function is only available when the Automatic Document Feeder is installed.

*2 The maximum number of sheets acceptable varies depending on the type of original.

□ Maximum number of originals scanned at one time

You can scan up to 50 original sheets at one time. When the number of sheets to be scanned exceeds 50 or the built-in memory in the equipment is full, scanning stops and an error message is displayed on the LCD screen. To copy the data scanned so far, select “PRINT”. To delete them, select “CANCEL JOB”.

□ Precautions for Automatic Document Feeder

Do not use the following types of original as they may cause a paper misfeed or damage to the equipment:

- Originals that are folded or curled
- Originals with carbon copies
- Originals that have been taped, pasted, or cut-out
- Originals that have been clipped or stapled
- Originals with holes or tears
- Originals that are damp
- Overhead transparencies or tracing paper
- Coated paper (e.g. coated with wax)
- Originals with multiple holes punched (e.g. loose leaf paper)

The following types of originals can be used but need extra care:

- Originals that you cannot slide with your fingers or whose surface is specially treated (they may not be able to be separated from each other at feeding)
- Originals that are folded or curled (should be smoothed out before being used)

When black streaks appear

If the scanning area or the guide area is dirty, image problems such as black streaks may occur. Weekly cleaning of these areas is recommended.

📖 P.110 “Regular Cleaning”

■ Copying originals

Follow the common basic instructions below to make a copy.

📖 P.61 “How to print”

■ Considerations and limitations

- Some print options can be set from both the application and the printer driver, such as collation. If the collation is set from the application, documents may not be properly printed. If that happens, use the printer driver to set the collation. Depending on the application, some print options such as the orientation need to be set from the application. For print options that can be set from both the application and the driver, refer to the manual of the application.
- When you print from your PC while another user uses the equipment for copying, the printing starts after approx. 30 seconds have passed since another user finishes the operation for copying.

3

■ How to print

Once you have installed the printer driver and configured it properly, you can print directly from most Windows applications. Simply choose the Print command from your application.

You can print using the various functions by setting print options on the printer driver.
