

Installation and Activation

How to install MeasureIt

Thanks for purchasing MeasureIt.

1. To install the plugin, copy or move the folder "**MeasureIt**" into this path: Applications -> MAXON > Cinema4D > Plugins, then quit and restart Cinema4D. (When Cinema4D start again the plugin Activation window appears and disappears after few seconds).

WARNING: MeasureIt activation is different from other C4Dzone plugins due to a different technology, please read deeply the follow instructions.

2. To activate MeasureIt, go to **Plugins** menu and select **Reload Python Plugins** and the activation windows appears again. Copy the **Installation Code** (CTRL + C).
3. Click "**Get your Key now**" button and you'll be redirected on **C4Dzone** into your **Orders list**. (if wrong browser will be open, try with your preferred browser and go to your Orders list).
4. Search your **MeasureIt** order.
5. Click the little **magnifying glass** button to open the order and paste the Installation code into Poly Breaker field and hit the "+" button.
6. After some seconds the **License Key** appears. If an error appears, try again by using the same form. Don't use a new form field.
7. Copy your **License Key** from site (CTRL + C) and paste it (CTRL + V) into **MeasureIt**.
8. Press "**Activate your License**" button.
9. Now your Licence is active. If you got error during activation into **MeasureIt** verify by paste again the License Key into MeasureIt. If you got error again maybe you have **permission problems** into Cinema 4D **Plugin** folder (on windows systems) and you have to try these steps:
 1. Right Click on Cinema 4D icon
 2. Run as -> Administrator
 3. Activate the plugin
 4. Restart Cinema Normally

If it doesn't work in the **Documentation** folder there is a PDF "**Edit-Permissions.pdf**".
Don't generate other License Keys on C4Dzone.com because the key you got is correct.

Warning!:

MeasureIt has been activated based on your hardware configuration, there is not connection between MeasureIt and Cinema4D serials, so if you need to reinstall your Cinema4D or change its serials you can find the Licence Key into C4Dzone order details, otherwise you can backup your MeasureIt folder already activated. The License Key works only on this computer.

MeasureIt can be activate for max 3 times, based on 3 different hardware configurations.

If you need help feel free to visit our support forum on www.c4dzone.com on [Plugin C4Dzone](#) section or write to matteo@c4dzone.com.

Thanks to you
