Federal Communications Commission (FCC) Radio Frequency Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device in accordance with the specifications in part 15 of the FCC rules.

These specifications are designed to provide reasonable protection against such interference in a residential installation. This equipment may generate, apply and radiate radio-frequency energy. If it is not installed and used in accordance with our instructions, it may cause interference with radio communications. However, there is no guarantee that interference will not occur in a particular installation. If the equipment causes any harmful interference to radio or television reception (You can determine whether your equipment is causing interference by turning the equipment on and off), it is recommended that the user try to correct the interference by using one or more of the following measures:

- Reorient or reposition the reception antenna.
- Enlarge the distance between equipment and receiver.
- Plug the equipment into an outlet that is on a different circuit from the receiver.
- Consult and ask the dealers or experienced radio/television technicians to provide assistance.

According to the FCC provisions, the user shall be informed of the following issues:

Discretionary changes or modifications to this equipment without UGtizer's written authorization could negate your authority to operate this product.

You shall apply for your equipment the special interface cable provided or sold by UGtizer. Application of other cables will not comply with the limits in accordance with the specifications in part 15 of the FCC rules.
